The Clerk read the title of the concurrent resolution.

The text of the concurrent resolution is as follows:

#### H. CON. RES. 123

Resolved by the House of Representatives (the Senate concurring).

# SECTION 1. AUTHORIZATION OF USE OF CAPITOL GROUNDS FOR D.C. SPECIAL OLYMPICS LAW ENFORCEMENT TORCH RUN.

On June 8, 2007, or on such other date as the Speaker of the House of Representatives and the Committee on Rules and Administration of the Senate may jointly designate, the 2007 District of Columbia Special Olympics Law Enforcement Torch Run (in this resolution referred to as the "event") may be run through the Capitol Grounds as part of the journey of the Special Olympics torch to the District of Columbia Special Olympics summer games.

# SEC. 2. RESPONSIBILITY OF CAPITOL POLICE BOARD.

The Capitol Police Board shall take such actions as may be necessary to carry out the event.

# SEC. 3. CONDITIONS RELATING TO PHYSICAL PREPARATIONS.

The Architect of the Capitol may prescribe conditions for physical preparations for the event.

#### SEC. 4. ENFORCEMENT OF RESTRICTIONS.

The Capitol Police Board shall provide for enforcement of the restrictions contained in section 5104(c) of title 40, United States Code, concerning sales, advertisements, displays, and solicitations on the Capitol Grounds, as well as other restrictions applicable to the Capitol Grounds, in connection with the event.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from Texas (Ms. EDDIE BERNICE JOHNSON) and the gentleman from Missouri (Mr. GRAVES) each will control 20 minutes.

The Chair recognizes the gentlewoman from Texas.

#### GENERAL LEAVE

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and to include extraneous material on House Concurrent Resolution 123.

The SPEAKER pro tempore. Is there objection to the request of the gentle-woman from Texas?

There was no objection.

## □ 1345

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Concurrent Resolution 123 authorizes the use of the Capitol Grounds for the District of Columbia Special Olympics Law Enforcement Torch Run.

The Capitol Police, along with the D.C. Special Olympics, will participate in the torch run to be held on June 8, 2007. The D.C. Special Olympics will work closely with the Capitol Police and the Architect of the Capitol to make sure that the event is in full compliance with rules and regulations governing the use of the Capitol Grounds

The Law Enforcement Torch Run for the Special Olympics is run nationwide

by law enforcement officials leading up to each State's or national Special Olympics summer games. Each year, nearly 50 local and Federal law enforcement agencies in Washington, D.C. participate to show their support of the D.C. Special Olympics. This torch relay event is a traditional part of the opening ceremonies for the Special Olympics. For the fifth year these opening ceremonies will take place at Catholic University in the District of Columbia. This is a worthwhile event attended by thousands of Special Olympians, their families and friends, and I support the resolution.

Mr. Speaker, I reserve the balance of my time.

Mr. GRAVES. Mr. Speaker, I yield myself such time as I may consume.

House Concurrent Resolution 123 authorizes the use of the Capitol Grounds for the District of Columbia Special Olympics Law Enforcement Torch Run, which will be held June 8, 2007. This event is cosponsored by the U.S. Capitol Police.

The Special Olympics is an international organization dedicated to enriching the lives of children and adults with disabilities through athletics. The U.S. Capitol Police will host the opening ceremonies for the torch run, which will take place on the west terrace of the Capitol. Once lit, the torch will be carried to Fort McNair. An estimated 2,000 law enforcement representatives from more than 60 local and Federal law enforcement agencies will participate in this year's event.

Congress has traditionally supported this worthy cause by authorizing the use of the Capitol Grounds. I encourage my colleagues to join the law enforcement community in supporting the Special Olympics and join me in supporting this resolution.

Mr. OBERSTAR. Mr. Speaker, I rise in strong support of H. Con. Res. 123, which authorizes the use of the Capitol Grounds for the District of Columbia Special Olympics Law Enforcement Torch Run.

Thanks to the tenacity to Eunice Kennedy Shriver and her family, thousands of Special Olympians see their self-confidence, self-esteem, and health increase by participating in the Special Olympics. These games highlight the athletic feats of mentally challenged children and young adults. Confidence and self-esteem are the building blocks for these Olympic Games. Better health, coordination, and lasting friendships are the results of participation.

The Law Enforcement Torch Run for the Special Olympics is run nationwide by law enforcement officers, leading up to each state's and the national Special Olympics Summer Games. Each year, nearly 50 local and Federal law enforcement agencies in Washington, DC, participate to show their support of the DC Special Olympics. This torch relay event is a traditional part of the opening ceremonies for the Special Olympics. Law enforcement officers, who are part of the extensive volunteer network that supports the games, carry the Olympic torch across the Capitol Grounds through the District of Columbia to Catholic University. The Capitol Police, along with the

DC Special Olympics, will participate in the torch run to be held on June 8, 2007.

Each year, approximately 2,500 Special Olympians of all ages compete in the DC Special Olympics in more than a dozen events. The event is supported by thousands of volunteers from the District and the region and is attended by thousands more family and friends of Special Olympians.

These games are a wonderful expression of inclusiveness and a confirmation of individual contribution. I enthusiastically support this resolution and the very worthwhile endeavor of the Special Olympics.

I urge my colleagues to join me in supporting H. Con. Res. 123.

Mr. GRAVES. Mr. Speaker, I yield back the balance of my time.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, I urge passage, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Texas (Ms. EDDIE BERNICE JOHNSON) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 123.

The question was taken; and (twothirds being in the affirmative) the rules were suspended and the concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

SUPPORTING THE GOALS AND IDEALS OF NATIONAL PUBLIC WORKS WEEK

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 352) supporting the goals and ideals of National Public Works Week.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

### H. RES. 352

Whereas public works infrastructure, facilities, and services play a pivotal role in the health, safety, and well-being of the people of the United States;

Whereas public works infrastructure, facilities, and services could not be provided without the skill and dedication of public works professionals, including engineers and administrators, representing State and local governments throughout the United States;

Whereas public works professionals design, build, operate, maintain, and protect the transportation systems, water supply infrastructure, sewage and refuse disposal systems, public buildings, and other structures and facilities that are vital to the citizens, communities, and commerce of the United States;

Whereas the Department of Transportation estimates that every \$1,000,000,000 invested in the Nation's highway system creates 47,000 jobs, and every \$1 invested in the Nation's highway system generates more than six times that amount in economic activity;

Whereas every \$1 invested in public transportation generates as much as \$6 in economic returns to the Nation's economy;

Whereas the capital asset program of the General Services Administration is authorized annually to provide Federal employees with necessary office space, courts of law, and other special purpose facilities;

Whereas since 1972 the Nation has invested more than \$250,000,000,000 in wastewater infrastructure facilities to establish a system that includes 16,000 publicly owned wastewater treatment plants, 100,000 major pumping stations, 600,000 miles of sanitary sewers, and 200,000 miles of storm sewers;

Whereas the Pipelines and Hazardous Materials Safety Administration is charged with the safe and secure movement of almost 1,000,000 daily shipments of hazardous materials by all modes of transportation and oversees the safety and security of 2,200,000 miles of gas and hazardous liquid pipelines, which account for 64 percent of the energy commodities consumed in the United States;

Whereas the National Railroad Passenger Corporation annually provides more than 25,000,000 people with intercity rail service;

Whereas over the next 5 years, 8 airfield projects, including 5 runways, 2 runway extensions, and 1 airfield reconfiguration, will be commissioned providing some of the busiest airports in the Nation with the potential to accommodate more than 400,000 additional annual operations, while decreasing the average delay per operation at these airports by approximately 2 minutes;

Whereas in the report of the Department of Transportation entitled "2006 Status of the Nation's Highways, Bridges, and Transit: Conditions & Performance", the Department confirms that investment in the Nation's highway, bridge, and transit infrastructure has not kept up with growing demands on the system;

Whereas in that report, the Department of Transportation found that to maintain highway, bridge, and transit networks, governments at all levels would need to invest \$94,600,000,000 per year for each of the next 20 years, and to improve highway, bridge, and transit networks that level of investment would need to increase to \$153,700,000,000 per year; and

Whereas public works professionals are observing National Public Works Week from May 20 through 26, 2007: Now, therefore, be it Resolved, That the House of Representatives—

(1) supports the goals and ideals of National Public Works Week;

(2) recognizes and celebrates the important contributions that public works professionals make every day to improve the public infrastructure of the United States and the communities that those professionals serve; and

(3) urges citizens and communities throughout the United States to join with representatives of the Federal Government in activities and ceremonies that are designed to pay tribute to the public works professionals of the Nation and to recognize the substantial contributions that public works professionals make to the Nation.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from Texas (Ms. Eddie Bernice Johnson) and the gentlewoman from Virginia (Mrs. Drake) each will control 20 minutes.

The Chair recognizes the gentlewoman from Texas.

### GENERAL LEAVE

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Texas?

There was no objection.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, I yield myself such time as I may consume.

National Public Works Week is celebrated yearly during the third week of May. The week has been designated by a variety of organizations to celebrate our public works professionals and the critical work that they do to keep our infrastructure and transportation systems working efficiently and economically. House Resolution 352 pays tribute to these professionals, recognizing their work the week of May 20 through 26, 2007.

"Public works" are loosely defined as projects that are carried out for the public good, aptly named because they enable the public to complete its work. Hazardous materials, pipelines, municipal infrastructure such as water supply infrastructure and sewage and refuge disposal systems, and transportation systems, such as rail, highways, airports and public transit, all fall under the public works umbrella.

Our public works are vital to our Nation. Our commerce depends on the shipment of goods through rail, on our roads and through the air. Public transportation provides many with a cost-effective way of travel, while also reducing harmful effects on our environment.

Our public health depends on our water supply infrastructure as well as our sewage and disposal systems. According to a U.S. Geological survey, one person uses an average of 150 gallons of water per day. Although running water is expected in most homes in our Nation, many developing countries still consider this a luxury. Globally, 50 percent of the world's hospital beds are filled with patients suffering from water-borne illnesses, with one child killed every 8 seconds due to water-related sickness.

People in more developed nations, such as the United States, use up to 10 times more water than those in the underdeveloped poor countries. And we do take it for granted. For the importance that they play in our daily lives, our transportation and infrastructure systems and facilities often get the bad end of the deal, that is, although public works are depended on consistently, they receive no glory or praise when accomplishing the job. Rather, many only pay tribute and attention to these public works when they fail, such as sewage line breaks that flood our basements, or levee failures that result in flooded communities.

This legislative session the House has passed several key bills that will improve our water and wastewater infrastructure to further reduce facility and system failure. H.R. 569, the Water Quality Investment Act of 2007, amends the Federal Water Pollution Control Act to authorize appropriations for sewer overflow control grants. H.R. 700, the Healthy Communities Water Supply Act of 2007, amends the Federal Water Pollution Control Act to extend

the pilot program for alternative water source projects.

H.R. 720, the Water Quality Financing Act of 2007, amends the Federal Water Pollution Control Act to authorize appropriations for State water pollution control revolving funds.

And lastly, H.R. 1495, the Water Resources Development Act, authorizes water projects and U.S. Corps of Engineers policy changes.

It has been more than 6 years since a water resources bill was signed into law. And although water resource legislation is expected to be signed into law every 2 years, President Clinton was the last White House occupant to take an active role in our country's water and public health needs.

I recognize the importance of public works for our communities and our country, and I am grateful for the administrators, engineers and servicemen who continue to utilize their skills and provide hours of service and dedication to ensure these necessary facilities and systems work for our Nation.

I support this resolution and urge my colleagues to support it as well.

Mr. Speaker, I reserve the balance of my time.

Mrs. DRAKE. Mr. Speaker, I yield myself such time as I may consume.

House Resolution 352 is a bipartisan resolution which recognizes the important contributions that public works professionals make every day to improve the public infrastructure of the United States. I represent a coastal district in which healthy water transportation and infrastructure systems add to the economic and environmental prosperity of southeast Virginia. Healthy water transportation and infrastructure systems are not only important to coastal communities, but to every district across the country. To meet these needs, as well as the need for flood protection and environmental restoration, passing a Water Resources Development Act for 2007 is a matter of high importance.

According to separate studies conducted by the Congressional Budget Office, EPA and municipal groups, the current rate of capital investment will not keep our wastewater treatment systems operational. State and local governments are spending approximately \$10 billion a year in capital investments in wastewater infrastructure. Most of this funding comes from local ratepayers. For rural towns like those located on the eastern shore of Virginia, this often proves to be an unattainable feat.

Because of the importance public infrastructure places in enhancing our quality of life, improving our environment and contributing to our economic prosperity, it is important for Congress to recognize the contributions that professionals, engineers and administrators make to ensuring America remains the world's premier economic power.

I urge all Members to support H. Res. 352.

Mr. OBERSTAR. Mr. Speaker, I rise in strong support of H. Res. 352, supporting the goals and ideals of National Public Works Week.

Our Nation's public works—which consist of transportation systems, water supply infrastructure, sewage and refuse disposal systems, public buildings, and other structures and facilities—help our country function in an efficient and effective manner. As our public works support our economy, our public health, and our communities' livelihood, we must support the many public works professionals who design, build, operate, maintain, and protect these systems and structures. National Public Works Week is observed for a full week in May each year.

House Resolution 352 pays tribute to public works professionals, celebrating their work the week of May 20 through 26, 2007.

Without our vast network of rail, highways, airports, and public transit, our industries would not have the global reach that they currently utilize each working day. Without these transportation systems, many tourists would not have the chance to experience the vastly different climates and cultures our Nation has to offer.

Without our water supply systems, or our sewage and waste disposal facilities. our communities would not be able to exist and thrive. Simple conveniences that we may take for granted—running water in our homes for cooking and cleaning, and water systems that feed our backyard gardens, as well as our agriculture, factories, and industry—would not be possible without the dedicated work of the public works professionals who keep these facilities moving on a daily basis.

Indeed, it is often only when our systems and facilities fail to work consistently that we appreciate their contribution to our daily routines

Infrastructure keeps our country working, but in previous legislative sessions, we have not kept working on our infrastructure. In the "2006 Status of the Nation's Highways, Bridges, and Transit: Conditions and Performance" report prepared by the Department of Transportation, the Department confirms that investment in the Nation's highway, bridge, and transit infrastructure has not kept pace with demands on the system.

This Congress, we are working to reverse this unjustifiable trend.

The Committee on Transportation and Infrastructure has taken our public works needs seriously. Since the start of the 110th Congress, the Committee has shepherded four critical water infrastructure bills through the House:

H.R. 569, the Water Quality Investment Act of 2007; H.R. 700, the Healthy Communities Water Supply Act of 2007; H.R. 720, the Water Quality Financing Act of 2007; and H.R. 1495, the Water Resources Development Act of 2007.

It is my hope that this Resolution will reinforce the necessity for our colleagues in the other body to pass similar legislation. It is critical for us to conference these bills without delay, and ask the President to recognize both the needs and the accomplishments of public works and its professionals.

I celebrate our country's transportation and infrastructure.

I urge my colleagues to join with me in supporting House Resolution 352, to honor the

professionals who provide the backbone for our transportation and infrastructure systems and facilities.

Mrs. DRAKE. Mr. Speaker, I yield back the balance of my time.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, I would urge the passage of this measure, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Texas (Ms. Eddie Bernice Johnson) that the House suspend the rules and agree to the resolution, H. Res. 352.

The question was taken; and (twothirds being in the affirmative) the rules were suspended and the resolution was agreed to.

A motion to reconsider was laid on the table.

COMMEMORATING MARINAS AND EXPRESSING SUPPORT FOR SIXTH ANNUAL NATIONAL MARINA DAY

Mr. CUMMINGS. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 343) commemorating the marinas of the United States, expressing support for the designation of the sixth annual National Marina Day, and for other purposes, as amended.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

#### H. RES. 343

Whereas the citizens of the United States highly value recreation time and their ability to access 1 of the greatest natural resources of the United States, its waterways;

Whereas, in 1928, the word "marina" was used for the first time to define a recreational boating facility;

Whereas the United States is home to over 12,000 recreational boating facilities that contribute substantially to their local communities by providing safe, reliable gateways to boating for members of their communities and welcomed guests:

Whereas marinas of the United States also serve as stewards of the environment, actively seeking to protect their surrounding waterways not only for the enjoyment of the current generation, but for generations to come:

Whereas marinas of the United States also provide their communities and visitors a place where friends and families, united by a passion for the water, can come together for recreation, rest, and relaxation; and

Whereas marinas throughout the United States will be celebrating National Marina Day on August 11, 2007: Now, therefore, be it Resolved, That the House of Representatives—

(1) commemorates the marinas of the United States for providing environmentally friendly gateways to boating for the citizens of, and the visitors to the United States; and (2) supports designation of the sixth annual

'National Marina Day' in order—

(A) to honor the marinas of the United

(A) to honor the marinas of the United States for their many contributions to their local communities; and

(B) to make citizens, policy makers, elected officials, and employees more aware of the overall contributions marinas make to their well-being.

The SPEAKER pro tempore (Mr. PASTOR). Pursuant to the rule, the gentleman from Maryland (Mr. CUMMINGS) and the gentlewoman from Virginia (Mrs. DRAKE) each will control 20 minutes.

The Chair recognizes the gentleman from Maryland.

#### GENERAL LEAVE

Mr. CUMMINGS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H. Res. 343.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. CUMMINGS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in strong support of H. Res. 343, as amended, which would support designation of August 11, 2007, as the sixth annual National Marina Day.

National Marina Day recognizes the central role that marinas play in giving shelter and providing gateways to the nearly 13 million recreational boats registered in the United States. National Marina Day is also intended to recognize the important role that recreational boaters and marina operators play in protecting our Nation's critical marine resources.

Recreational boating is a central part of the tourism and recreation industry in the United States. According to the National Marine Manufacturers Association, in 2005 recreational boating generated an estimated \$37 billion in sales and services nationwide. In my own State of Maryland, there are just over 200.000 registered boats. A study by the Maryland Sea Grant program estimated that in 2005 every 7.5 boats in the State supported a job in our State's economy and contributed just over \$7,600 in economic activity. Recreational boating contributed an estimated \$1.8 billion to the State's gross product

The millions of Americans who participate in recreational boating activities rely on the estimated 12,000 marinas and associated boating facilities in our Nation to access not only the water, but also the support services that boats and boaters need. An estimated 30 percent of these marinas are owned by municipal or State governments and provide the public with water access at low or limited cost. The remaining 70 percent of marinas are private, and many are owner-operated facilities with long family histories.

Importantly, however, marinas are not only centers where boats can obtain fuel and services. They are also centers providing boating safety and boating education programs intended to help improve the operating proficiency of recreational boaters.

## □ 1400

Though 35 States now have some type of operator education or licensing
